Leapy — Engineering Protection Since 1997

Precision-Crafted Safety, Technology-Defined Quality.

Leapy specializes in high-performance PPE and workwear for global clients, delivering professional workwear, heavy-duty project apparel, daily protective clothing, and customized corporate uniforms worldwide.

Backed by **30 years of industry expertise** and **80+ patented technologies**, we operate a **16,500 ㎡ in-house manufacturing base**, equipped with **12 automated production lines** and staffed by **300+ skilled employees**. Our annual production capacity reaches **5,000,000 pieces**, supporting large-volume orders and stable global delivery.

Our workwear solutions serve diverse industry sectors. We combine engineered craftsmanship with reliable volume supply, empowering global partners through certified quality and sustainable innovation.

- Founded: 1997
- 30+ Years Industry Experience
- 80+ Patented Technologies
- 16,500 ㎡ Manufacturing Base
- 12 Automated Production Lines
- 300+ Skilled Employees
- Annual Output: 5 million pieces

Smart Manufacturing for Scalable & Reliable Production

State-of-the-art cutting technology drives large-scale manufacturing of Leapy's safety apparel. Our well-equipped factory floor supports streamlined production processes, every step optimized to meet global demand for durable, high-quality workwear.

Our **intelligent warehouse** acts as a well-organized logistics hub, supporting massive cross-border cargo turnover. Skilled workers collaborate with automated equipment for precise operations. Every process is optimized to meet strict timelines of international shipping.

Core production assets:

✔ Advanced automatic cutting tables for high-precision fabric processing

✔ 12 full-automated production lines for consistent output

✔ Intelligent warehouse system for efficient inventory & global logistics

✔ Large-scale facility to fulfil high-volume bulk orders

We keep sustainability in every production step: recycled fabrics, PE packaging bags and FSC® certified cartons are adopted throughout our supply chain.

Laboratory-Validated Quality & Authorized Certifications

Our modern in-house laboratory conducts rigorous material testing. Technicians run performance tests on fabrics, measuring durability and functional performance under controlled conditions. Every test ensures compliance with international safety standards.

Our core product ranges are validated against well-known EU standards including EN343, EN342 and EN14058. We submit fabrics and accessories to professional third-party laboratories for compliance testing.

We hold multiple authoritative third-party certifications, covering functional performance, material safety and social factory audit standards. Partner with Leapy: You gain access to our patented workwear technology, large-scale manufacturing capacity, in-house testing capability and verified compliance, for custom or bulk workwear projects worldwide.
